Trouble Launching or Getting Back to a Simulation

When you launch a simulation, it opens in a NEW POP-UP WINDOW not in a Browser Tab. If you go back to your browser before you finish the simulation, you may have to resize or minimize your browser to find the simSchool simulation window.

When you launch a simulation it runs in a Pop-Up Window
Note: You may have to resize your browser window or minimize it.

Click anywhere on the simulation window to bring it to the front.

If you cannot find an open simulation window and cannot re-launch the simulation, log out of simSchool, clear your browser’s recent history, and close your browser. Re-launch your browser, log in to simSchool and try again.
